

# THE DEBATE

**Cabernet Sauvignon  
Elevate The Debate**

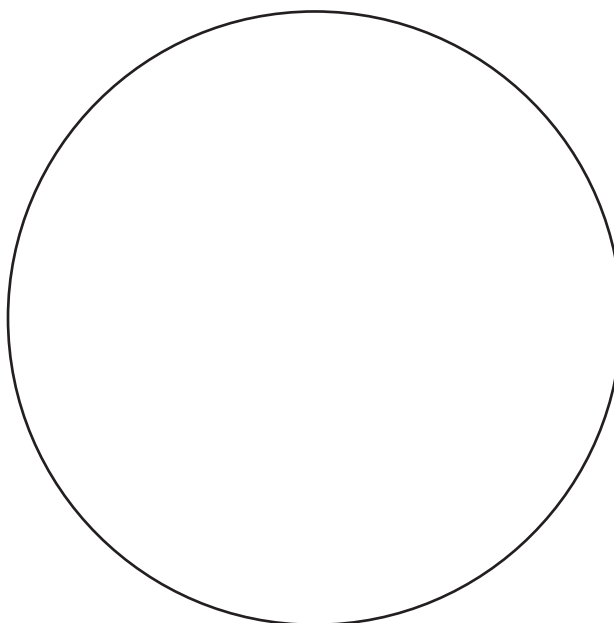

---

## **Artalade Vineyard**

---

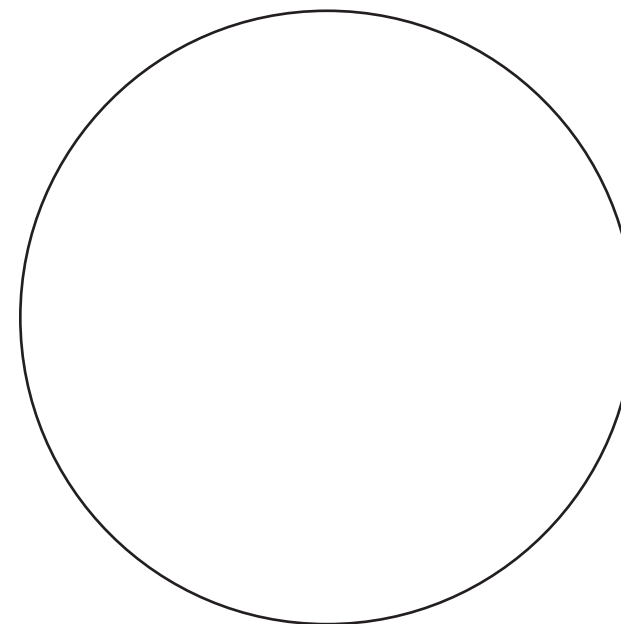

- Located on 'Pritchard Hill'
- 1,100 feet in altitude
- Volcanic and metamorphic rock with red and yellowish iron soils and a hint of clay
- Cross among structure, force and charm, where the structure and volcanic soil bring the frame, and the lushness and depth bring the magic.

## **Sacrashe Vineyard**

---

- Located in Rutherford AVA
- 800 feet in altitude
- Volcanic rock, silt loam and gravelly, shattered rhyolitic tuff
- The minerality and freshness translate distinctly into the wine to bring a fantastic backbone to high density and power.

## **Denali Vineyard**

---

- Located in St. Helena AVA
- 500 Feet in altitude
- Weathered volcanic rock with gravelly loam
- The warmest and earliest ripening Cabernet Sauvignon site with a beautiful terraced vineyard which produces small, concentrated berries with a great balance between jamminess and depth.
